EDUCATION

B.TECH Electronics & Communication Engineering

Sept 2022 - June 2026

Bharati Vidyapeeths College of Engineering; CGPA: 7.9

EXPERIENCE

The Group Three

Jan 2026 – June 2026

Full-Stack Developer Intern

Delhi

- Developed a complete **Admin Panel** using **React.js** and **Tailwind CSS**, and contributed to the **backend** using **Node.js** and **Express.js**.
- Performed **A/B testing** to optimize UI/UX and improve conversion rates.
- Independently developed the complete **Crawlux frontend** using **React.js** and improved the **backend architecture** for better performance.
- Independently built and integrated **email automation**, **referral**, and **badge systems** across both **frontend** and **backend**.

NeuralSift

June 2025 – Aug 2025

App Development Intern

Hybrid

- Integrated **Firebase Analytics** and **BigQuery**, enabling data-driven insights and improving user engagement tracking accuracy by **35%**.
- Collaborated with the backend team to integrate **real-time voice and video calling features**, improving **in-app communication efficiency** and increasing active session duration by **25%**..
- Revamped the **UI/UX design**, reducing navigation time by **20%** and increasing overall user satisfaction.

PROJECTS

MediaMind AI ([Github](#))

Tech Used – **React.js**, **Python**, **FastAPI**, **MongoDB**, **LangChain**, **Groq API**, **Docker**, **Github Action**

- Built an AI-powered **Document & Multimedia Q&A Platform** using **React.js**, **FastAPI**, and **MongoDB**.
- Implemented a **RAG-based pipeline** using **LangChain**, **FAISS**, and **HuggingFace embeddings** for semantic search and contextual question answering.
- Integrated **Whisper-based transcription** to process **audio** and **video** files with timestamp extraction.
- Containerized using **Docker** and automated workflows with **GitHub Actions**.

Movie Booking App ([Github](#))

Tech Used – **Python**, **FastApi**, **PostgreSQL**, **Redis**, **Celery**

- Developed a **Movie Reservation backend system** to search movies, view showtimes, and reserve seats.
- Designed and compared **Pessimistic DB Locking** and **Redis Distributed Locks** to handle **10K+ concurrent** seat requests with **zero double-bookings**.
- Engineered a **Redis TTL + Celery-based seat-hold state machine**, automatically releasing unbooked seats after **10 minutes** to maximize **ticket inventory utilization**.

SKILLS

Programming Languages:

C++, Python, JavaScript, Typescript, SQL

Web Development:

Next.js, React.js, Express.js, Node.js, MongoDB, MySQL, PostgreSQL, Prisma, FastAPI, Tailwind CSS, Shaden/ui, Figma

DevOps:

AWS, Docker, Github Action, Git, Github

ACHIEVEMENTS

- Secured 1st position among 200+ participants in the Project Competition
- Solved 300+ problems on LeetCode
